BELKIN®

SATA II RAID 2-Port (1 Internal/1 External) PCI Express™ Card

Add 2 Serial ATA II RAID ports to your computer using PCI Express technology

EN | Why PCI Express?

PCI Express, the new standard that will replace PCI, effectively quadruples the amount of available computing bandwidth. This results in faster music downloads, smoother video streaming, and lightning-fast access to mass-storage devices, without your computer freezing, crashing or slowing down to a trickle. PCI Express cards do not fit standard PCI slots.

The Belkin SATA II RAID 2-Port PCI Express Card offers the perfect solution for users who want to add Serial ATA II ports to their computers.

NL | Waarom PCI Express?

PCI Express, de nieuwe standaard die PCI zal vervangen, verviervoudigt op efficiënte wijze de hoeveelheid beschikbare computerbandbreedte. Hierdoor kunt u sneller muziek downloaden, verloopt video-streaming veel vlekkelozer en is ultrasnelle toegang tot massaopslagapparaten mogelijk. PCI Express-kaarten passen niet in standaard PCI-sleuven.

De 2-poorts SATA II RAID PCI ExpressCard van Belkin is ideaal voor gebruikers die hun computers willen uitbreiden met seriële ATA II-poorten.
