Notebook Security Lock

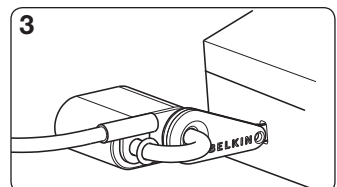

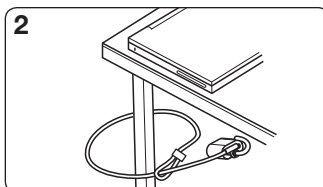

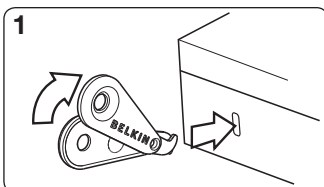

- For individual use
- Works with laptops, docking stations, flat-screen monitors, and other small electronic devices
- Provides physical and visual theft deterrence

Corporate Notebook Security Lock

- Each individual lock comes with a unique set of keys
- Works with Master Key for IT/admin access, that opens up each lock
- Reduces downtime during times of key loss or personnel changes

3 Easy Steps:

1. Open pivot device and insert it into the security slot on your laptop. Close pivot device securing laptop.
2. Wrap cable around a stationary object and feed one end through the cable loop.
3. Attach lock to cable and pivot device, and then lock.

Frequently Asked Questions

Q: How big is the security slot on the notebooks and monitors?

A: The security slot (also known as chassis slot or lock slot) is 5/16 of an inch.

Q: Will the Security Lock work with Apple® laptops?

A: Yes, it is compatible with any laptop that features a security slot. This feature is available on most Apple laptops except the MacBook Air™. You should always check your hardware to ensure it features the necessary security slot.

Q: Can I get a different cable length aside from the included 6-foot cable?

A: No, the included 6-foot cable is the only solution Belkin provides.

Q: What are the main differences between the Corporate Notebook Security Lock (F8E550-CMK) and the Notebook Security Lock (F8E550)?

A: The padlock included with F8E550 can only be opened using the two keys included in the package. The padlock included in F8E550-CMK can be opened using either the two keys included in the package, or with a Master Key (F8E550-C) to open all “-CMK” padlocks.

Q: Can I order more Master Keys (F8E550-C) to open up the locks I have?

A: Yes, you can order multiple Master Keys to open up all your Corporate Notebook Security Locks [(F8E550)-CMK].

Q: Is there are a minimum or maximum number of keys I can order?

A: No, you can order any number of Master Keys.

Q: Will the keys for the other Notebook Security Lock (F8E550) work with the Corporate Notebook Security Lock (F8E550-CMK)?

A: No. The keys included with the Notebook Security Lock (F8E550) will only work with those specific locks.

Q: Why are Belkin's locks cheaper than competitor solutions?

A: Belkin Corporate/Notebook Security Locks are very simple. While Belkin Notebook Security Locks are effective, they provide a stronger visual deterrent from theft.
