

USB Just Got 40 Times Faster

USB 2 Hi-Speed 4-Port Hub

USB 2 Hi-Speed 5-Port PCI Card

USB Just Got 40 Times Faster

USB 2 IS HERE, bringing astounding 480Mbps speed to USB connectivity. With a bandwidth 40 times greater than 1.1, it is the ideal interface for transferring extremely large amounts of data from USB 2-compliant products such as real time video cameras, scanners, portable drives, and others. Gear up for a whole new class of USB devices made possible through the introduction of this interface advancement.

USB 2 works with all USB 1.x products seamlessly, so you don't have to change your configuration until it's time to upgrade. All the connectors are fully compatible with USB 1.x equipment, and no cable adapters are required. The new interface offers the same great Plug-and-Play convenience and ensures perfect setup and operation of any USB peripheral. You can still connect up to as many as 127 devices to your computer—the only difference is in your ability to connect hi-speed USB 2 peripherals.

WITH THE USB 2 HI-SPEED HUB, industry frontrunner Belkin Components offers USB 2 connectivity to multiple devices through a 4-port hub. Connect up to four high speed devices such as a next-generation scanner, printer, and video camera simultaneously.

PRODUCT FEATURES

- Adds four additional USB 2 hi-speed ports to your computer:
 - one upstream connector
 - four downstream connectors
- Compact and stackable design takes up little space and allows for future expansion
- Backward compatible with all USB 1.x products (no adapters required)
- Ultra-fast 480Mbps data transfer speeds
- Bus-powered or self-powered
- Plug-and-Play installation

PACKAGE INCLUDES

- Belkin USB 2 hi-speed hub
- USB 2 device cable
- AC power adapter
- User's Manual

SYSTEM REQUIREMENTS

- Pentium-class PC with USB 2 port
- Windows® OS
