

## N1 Wireless Modem Router

Connect your wired and wireless desktop computers and notebooks to your Belkin Wireless N1 Modem Router to share your broadband Internet access.

Connect your wired and wireless desktop computers and notebooks to your Belkin Wireless N1 Modem Router to share your broadband Internet access.

The Modem Router also lets your computers quickly and efficiently exchange documents, share resources, and distribute large video and music files throughout your network at a link rate of up to 300Mbps.\*

Our advanced security protects both your wireless and wired computers from hackers and intruders. You can add up to 32 computers to your wireless network with additional notebook and desktop adapters.

Based on the 802.11n draft, N1 Wireless enables multiple receivers and transmitters to send and receive data through the air, using Intelligent MIMO (Multiple Input Multiple Output) spatial multiplexing techniques. This smart-antenna technology builds upon the widely deployed 802.11g standard by increasing speed, coverage, and reliability of wireless systems. Providing greater range and faster speeds, N1 Wireless offers a quick and efficient way for people to distribute video, music, photos, and files among the networked computers in their homes.

For maximum wireless performance, use the Belkin N1 Modem Router with N1 Notebook and Desktop Cards connecting your client computers.
