

S-Video and Digital Optical Audio Cable Kit

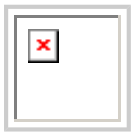

This Kit provides ideal connections for your video and gaming devices and for equipment that supports Dolby Digital and DTS surround sound. It offers exceptional quality in both cables: digital optical fiber is immune to all forms of EM/RF interference for superior sonic accuracy, and S-video separates brightness from colour using two separate conductors to create clean, accurate signals.

Benefits

- Improves clarity, using superior-grade optical fiber and 99.99%-purity copper conductors
- Provides maximum durability and lowest-possible loss, using high-performance cladding
- Maintains signal integrity and 75-Ohm impedance using precision-formulated, polyethylene dielectric material
- Outstanding Signal-To-Noise Ratio
- Provides maximum isolation from electromagnetic and radio frequency interference with double-shielded construction
- Isolates noise with 100%-coverage aluminum/Mylar foil shield
- Creates a second layer of protection with tinned, copper-braided shielding
- Eliminates the corrosion that is common in bare, copper-braided shielding
