

Composite Video Cable

Composite Video connections are used in nearly all consumer video devices.

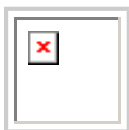

PureAV Silver Series Composite Video Cables deliver true 75-Ohm impedance and utilize the finest-grade materials and advanced technology to deliver brighter, more saturated colours and sharper images.

Benefits

- Distributes a consistent, accurate picture by providing maximum bandwidth with true 75-Ohm impedance
- Drastically reduces signal distortion for unrivaled image clarity using 99.9997% oxygen-free, PCOCC conductors and high-purity, silver solder joints
- Delivers best high-frequency response for optimal resolution using silver-plated conductors
- Isolates from outside noise for superior clarity with quad-shielding
- Maintains stronger signals that yield superior color accuracy and clarity with precision-formulated, nitrogen-injected dielectric material
- Protects against wire damage for consistently high-quality video with integrated strain relief
- Maintains integrity, even when bent with abrasion-resistant, flexible PVC jacket
- Creates precise contact for low loss with split-tip, center-pin, and 8-cut, 24k gold-plated connectors
- Provides comfort and ease of install with non-slip rubber grip and integrated color-coding
