

Gold Series IEEE 1284 Parallel Printer Cable (A/B) - 7.5m - F2A046b7.5M-GLD

The Gold Series Parallel Printer Cable attaches your IEEE 1284 printer with a Centronics 36-port to your PC with a DB25 port. Featuring 24K gold plated corrosion-proof connectors for maximum conductivity.

Características del producto:

- Fastest data transfer for maximum performance (up to 10 times faster than non-compliant IEEE 1284 cables)
- Tactiite™: overmold is a supple polymer designed to increase flexibility while maintaining durability
- 24K gold plated corrosion-proof connectors for maximum conductivity with no data loss
- Belkin Lifetime Warranty
- Oversized ergonomic thumbscrews make installation a breeze
- Tactiite™: molded strain relief provides a 360-degree turning radius for true protection against damage to the conductors
- Flexitec™: cable jacket is very durable and extremely flexible for use in tight areas
- Ground indents provide excellent conductivity and retention with mating conductors
- 18 tightly woven conductor pairs have each data line paired with a ground line to minimize cross talk, noise and other interference, ensuring error-free printing
- 28 AWG stranded tinned copper conductors are individually insulated in polypropylene to minimize cross talk, ensuring high-speed, error-free transmission
- PVC premold encapsulates individual conductors to ensure electrical isolation and relieve stress
- Double shielded braid and foil to meet IEEE 1284 specifications, and ensure compliance with FCC requirements, reducing EMI/RFI
