

PureAV™ Blue Series Scart Video Cable - AV21500ea

Experience a sharper, more vivid picture with PureAV Video Cables from Belkin. Using advanced engineering methods and the highest-quality materials, PureAV Cables isolate your signal from interference to deliver the purest video solution available. Ordinary video cables, such as those that come with your video device, sacrifice performance by using lowergrade materials, including steel or low-purity copper conductors. This results in signal loss, poor picture resolution, and inaccurate colours. PureAV's broad selection of products offers a full range of performance levels to enhance your home theatre experience. For true high definition video, the signal needs to be separated into each of three primary colours: red, green, and blue. Composite and S-Video combine these signals together and then separate them at the monitor, which can result in less than optimal picture quality. Specifically designed to allow for the best quality connection, this Scart cable provides bright, accurate colours and sharp picture detail. PureAV Scart cable is an ideal solution for high resolution image reproduction.

Características del producto:

- Connect a VCR, DVD or cable box to your television
- Provides maximum isolation from electromagnetic and radio frequency interference with quad-shielded construction
- Improves clarity with superior-grade, 99.99%-purity copper conductors
- Strengthens signal transfer using precision-formulated, polyethylene material
- Creates precise contact and increased durability with corrosion-resistant, 24k gold connectors
- Isolates noise with 100%-coverage aluminum/Mylar foil shield
- Creates 2 additional layers of protection with tinned, copper-braided or spiral shielding
- Eliminates the corrosion that is common in bare, copper-braided or spiral shielding
- Belkin Lifetime warranty
- Available in the following lengths: 0.9m, 1.8m and 3.7m
