

BELKIN.

USB 2.0 Flash Drive - 128 MB

Storing and moving data has never been easier. The Belkin USB Flash Drive simply plugs into the USB port on your laptop, PC, or workstation, and starts saving and transporting your important business and personal data. The USB Flash Drive is available in 64, 128, 256, 512 MB and 1GB versions to give you enough room to store documents, presentations, downloaded music and videos, high-resolution photographs, or whatever other files you want to take with you. The USB Flash Drive takes advantage of USB plug and play capability. Simply plug the unit into any USB port and your computer will automatically detect it as a removable disk drive. Then, you can read, write, copy, delete and move data from your hard disk drive to the USB Flash Drive, or to your drive. The USB Flash Drive is password protected and doesn't require a battery or special software and is fully compatible with Windows ME, Windows 2000, Linux Kernel version 2.4, and Mac OS. Drivers for Windows 98, Windows 98SE are included.
