

VHDCI68 Male SCSI Terminator - F2N1138

What is SCSI, pronounced Skuzzy? No, its not some sort of inappropriate language used to belittle a person. SCSI stands for Small Computer System Interface and this is a SCSI terminator that terminates the end of a SCSI chain. This cable is used with SCSI devices that have an Ultra Micro Centronics 68 (VHDCI) female port, like scanners and zip drives, to terminate the end of a SCSI chain. Belkin active terminators provide the clearest data signal maximizing signal integrity.

Características del producto:

- State-of-the-art wiring design ensures 100% compatibility.
- Supports SCSI III transmission speeds.
- The Belkin Lifetime Warranty.
- Single ended.
- Ground indents provide excellent conductivity and retention with mating connector.
- Gold plated copper contacts for a clean, clear transmission.
