

ExpandView CAT5 Dual Output Remote Module

Designed for the Digital Signage environment where two displays are placed back-to-back, the ExpandView CAT5 Dual Output Remote Module converts one UTP based video input into two HDDB15 VGA outputs.

Used in conjunction with the ExpandView CAT5 Broadcast Module or Line Splitter, the Dual Output Remote Module is capable of displaying digital signage to two displays from a single input. The Dual Output Remote Module is the most cost effective way to replicate a single source VGA signal on two displays with only one UTP input.

Benefits

- Provides connectivity for two displays from one UTP video input
- Perfect for back-to-back displays
- Reduces the amount of output ports required
- Supports high video resolutions of up to 1600x1200@75Hz
- 3-Year Manufacturer's Warranty
- Free Technical Support
