

## TuneCast II Mobile FM Transmitter - F8V3080eaBLKP

Now you can use your iPod, PDA, MP3, CD, cassette player, PC, or laptop to listen to your favorite tunes through any FM stereo receiver. The Belkin TuneCast II Mobile FM Transmitter wirelessly connects portable music players to your car or home stereo quickly and easily using FM radio waves. Just plug the TuneCast II into the headphone jack of your iPod, PDA, MP3, CD, or cassette player, or connect it to your PC or laptop computer. Tune your car stereo or receiver to any clear FM frequency, and enjoy your iPod music experience with more sound and fewer wires.

We add a great convenience feature with our unique Auto ON/OFF function. It frees you from having to manually toggle your TuneCast II's ON/OFF switch by simply powering on when an audio signal is detected. If no signal is detected for a period of 60 seconds, your TuneCast II switches off. This innovation preserves battery life while making your outstanding mobile audio experience simpler to enjoy.

TuneCast II also features 4 programmable memory slots allowing you to save the clearest station wherever you go.

TuneCast II includes a Belkin Mobile Power Cord that connects to your car's cigarette lighter-so you can preserve your batteries\* as you play your tunes on the road (will not charge the TuneCast II). This product is compliant with the EU standard for Band II Low Power Devices for use in Germany, Switzerland and Iceland. For all other countries, please refer to National Legislation for use.
