

OmniView KVM-over-IP 1x8-Port - F1DP108Gea

The OmniView KVM-over-IP Switch enables network administrators to monitor and control their servers from anywhere, at anytime. This round-the-clock access lets you troubleshoot servers faster and more efficiently, dramatically reducing server downtime and service costs. Designed to grow along with your server network, the Switch expands to support up to 248 servers via daisy-chaining. The Switch features built-in CAT5 technology to provide simplified deployment and reduced cable clutter.
