

N+ Wireless Router

Belkin's N+ Wireless Router features a USB Storage port on the back of the router for connecting USB storage devices such as an external hard drive or thumb drive to the network. Now you can centrally store and share media content and files from the USB hard drive to every computer on the network. This router also features gigabit Ethernet ports for a wired connection that can handle applications that take up a large amount of bandwidth. The N+ router is based on the draft 802.11n 2.0 technology which provides the wireless range to easily cover any-size home or office. The N+ Router has the bandwidth and speed for handling media intensive applications that take up large amounts of your bandwidth.
