

Powerline Turbo Single Adapter - F5D4073ukS

Powerline Turbo allows you to reliably transmit content from your Internet directly to your computer and other network devices through the electrical wires in your home. For areas in a home that are hard to reach by wireless connections, Powerline is the most reliable solution for providing secure Internet connectivity to these remote areas.

Setup of Powerline is simple with its plug-and-play connectivity. Connect one adapter to your router and plug into an available electrical outlet. Plug the second adapter into an available wall outlet and connect the other end to any device with an available Ethernet port such as a gaming console, set-top box, or computer.

Lifetime Warranty
