

250' Gray CAT 5e Horizontal UTP Bulk Cable - A7L504-250

What is a horizontal cable? Think of it as a subway that connects your town to other towns. In actuality it's a cable used on a Local Area Network (LAN) and it connects the network outlet to the patch panel from behind a wall. The gray CAT 5e Horizontal UTP Bulk Cable is used to connect a network outlet with a patch panel. This cable consists of 8 solid 24 AWG wires and comes in a 1000-foot reel box.

Product Features:

- Meets the performance requirement for Category 5e.
- Category 5e performance rated for any network application.
- This product is guaranteed for life!
- White conductor has color band for easy pair identification.
- Integrated pull string eases jacket stripping.
