

250' FastCAT™ Horizontal Cable - A7L604-250

What is a Horizontal cable? Think of it as a subway that connects your town to other towns. In actuality, it's a cable used on a Local Area Network (LAN) and it internally connects the network outlet to the patch panel.

This FastCAT™ 350 MHz UTP solid bulk cable, with PVC jacket, is used for premise wiring installation of a twisted pair network. Consists of 8 solid 24 AWG wires.

Product Features:

- White conductor has color band for easy identification of pairs.
- Integrated pull string eases jacket stripping.
- Attenuation tested to 350 MHz for greater headroom.
- Perfect in conjunction with 10 Base-T, 100 Base-T and Gigabit Ethernet connections.
- This product is guaranteed for life!
- Exceeds the performance requirement of Category 5e.
