SOHO Desktop KVM Switch

SOHO KVM Switch

Share one monitor, keyboard, and mouse between up to 4 computers with the redesigned SOHO Desktop KVM Switch

The Belkin SOHO Desktop KVM Switch lets you share one monitor, keyboard, and mouse between two or more computers, saving space on your desk and reducing equipment clutter. The sleek, new design incorporates a built-in USB 2.0 2-port hub with one of the ports conveniently located on the front. This is perfect for connecting an MP3 player, printer, scanner, or any other of your USB devices to the KVM Switch while allowing computers, also connected, to access them. Sensitive push buttons on the front allow for easy switching, and independent audio-switching means you can play music from one computer while accessing files from another!

The Belkin SOHO Desktop KVM Switch Features:

- Compatible with both Mac® computers and PCs
- Front-panel buttons with NEW LED indicator lights allow you to access audio and video content from multiple computers simultaneously
- Support for hot-key switching for optional switching
- Independent audio switching—Listen to music on one computer while you work from a different one connected to the KVM Switch!
- Built-in USB 2.0 2-Port Hub with convenient front access
- Available in VGA or DVI
- PS/2 or USB compatibility
- Cables are included!

*Model depicted above is F1DD104L.

**USB hub available on F1DS10XL and F1DD10XL series only.
