Aerial Antenna Cable

High-Performance, 75-Ohm, Double-Shielded Antenna Cable with Foamed Polyethylene Dielectric for Superior Video Performance

Experience a sharper, more vivid picture with PureAV Video Cables from Belkin. Using advanced engineering methods and the highest-quality materials, PureAV Cables isolate your signal from interference to deliver the purest video solution available. Ordinary video cables, such as those that come with your video device, sacrifice performance by using lower-grade materials, including steel or low-purity copper conductors. This results in signal loss, poor picture resolution, and inaccurate colors.

PureAV's broad selection of products offers a full range of performance levels to enhance your home theater experience.

Designed to outperform cables that come with your video device, this Aerial Cable provides a standard coaxial connection for improved color and sharper picture.

The Purest Picture.

PureAV RF Aerial Antenna:

- improves clarity with superior-grade, 99.99%-purity solid-copper conductors
- strengthens signal transfer using precision-formulated, foamed polyethylene, dielectric material
- creates precise contact and increased durability with corrosion-resistant, 24k gold antenna connectors
- delivers maximum bandwidth with 75-Ohm coaxial construction

Outstanding Signal-To-Noise Ratio.

PureAV RF Aerial Antenna:

- provides maximum isolation from electromagnetic and radio frequency interference with double-shielded construction
- isolates noise with 100%-coverage aluminum/Mylar foil shield
- creates a second layer of protection with tinned, copper-braided shielding
- eliminates the corrosion that is common in bare, copper-braided shielding
