

Connect your notebook or desktop computer to a wired network

The Belkin Gigabit USB 2.0 Network Adapter allows your notebook or desktop computer to connect to a gigabit network. Installing the Adapter allows your computer to share large files over your network quickly and reliably.

The Belkin 5-Port Gigabit Switch provides the central connection point for your gigabit 10/100/1000 network. Position your Gigabit Switch within cable length of your computer and servers and connect your Belkin Category 6 cables.

A Gigabit USB 2.0 Network Adapter connects a notebook or desktop computer to your Gigabit Ethernet switch.

Benefits

- Installs easily, with Plug-and-Play capability
- Transfers data 100x faster than traditional Ethernet
- Builds upon the widely deployed Ethernet standard
- Offers a cost-effective upgrade from 10/100 Ethernet

System Requirements

- Computer with one available USB 2.0 port
- CD-ROM drive
