

INTRODUCTION

Adjust sound properties to enable audio recording.

APPLIES TO:

- F5U228

Before you begin:

You will need:

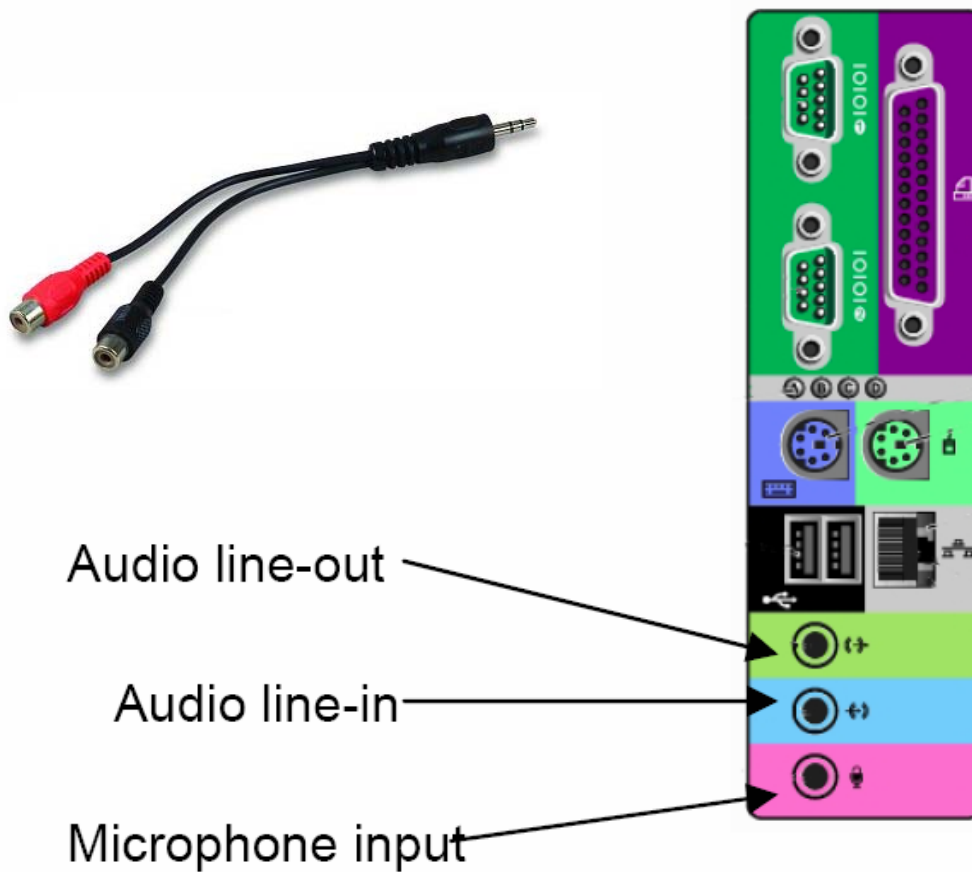

- Belkin High Speed DVD Creator
- Audio Cable

Hardware check:

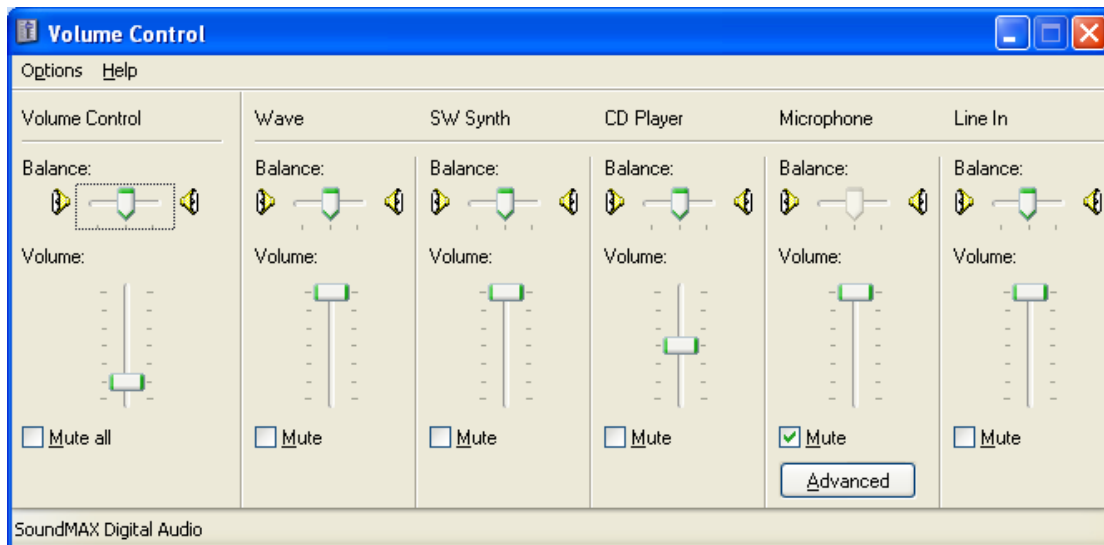

- Your computer is switched on
- The Belkin High Speed DVD Creator connected to the PC

STEPS:

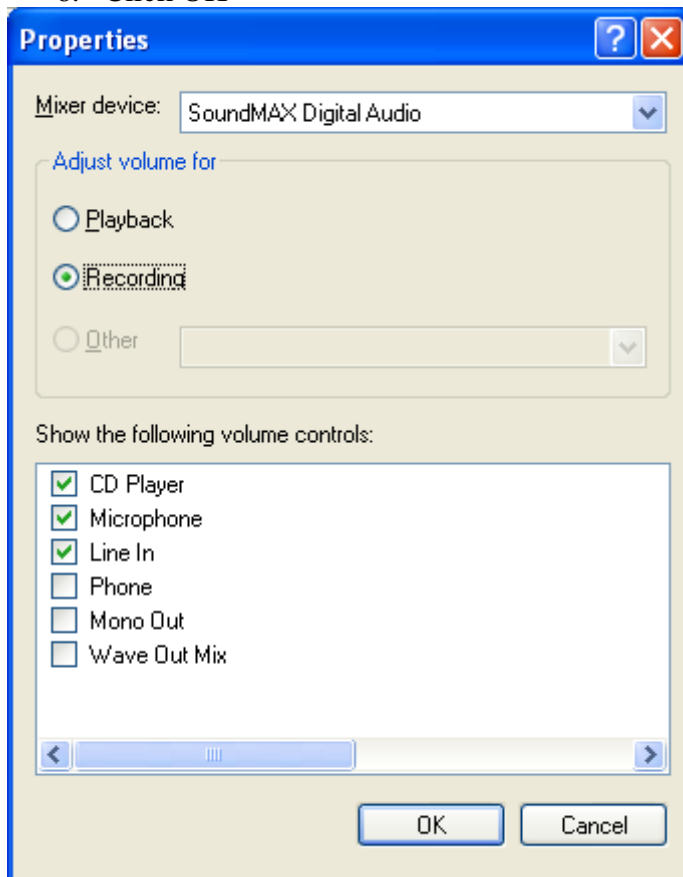

1. Ensure the supplied audio cable is connected to the Line In port.
Image for illustration purpose only, your PC's connections may differ

2. Double click on the speaker icon  11:21 AM
3. The following screen will appear, click **Options** then **Properties**

4. Under “Adjust volume for” select “Recording”
5. Ensure Line In is ticked
6. Click OK

7. Place the tick in “Select” under Line In and adjust to an appropriate level

8. Click the Red cross button to close the Recording Control

You should now be able to record with audio.
