

BELKIN CONNECTED EQUIPMENT WARRANTY/DATA RECOVERY WARRANTY

Belkin Corporation warrants to the original purchaser of any Belkin Surge Protector for the life of the product, that the Surge Protector shall be free of defects in design, assembly, material, or workmanship, and will repair or replace, at its option, any defective Surge Protector free of charge. Belkin Corporation's Connected Equipment Warranty covers equipment that is damaged by transient voltage (an "Occurrence") while properly connected through a Belkin Surge Protector to a properly wired AC power line with a protective ground.

This warranty is null and void unless all wires leading into the equipment pass through an appropriate Belkin Surge Protector as described herein below. The warranty will not cover claims for damage resulting from telephone-line/network-line transients unless the equipment is properly connected to one of the following Surge Protectors that offer telephone-line/network-line protection: models F9H610-04, F9H710-06, F9H710-12, F9H620-CW, F9H120-CW, F9H320-CW, F9H600-06-MTL, F9H620-06-MTL, F9H520-06, F9S820-06, F9S820-12, F9S823-06, F9S520-06, F9M520-08, F9M820-08, F9M623-CW, F9M923-08, F9G934-10, F9G930-10, F9G933-10, F9G1030-12, F9G1033-12 and F9A833-10. The warranty will not cover claims for damage resulting from coaxial-line transients unless the equipment is properly connected to one of the following Surge Protectors that offer coaxial-line protection: models F9H702-06, F9S823-06, F9M623-CW, F9M923-08, and F9G933-10. If you are using an AC Surge Protector that does not have phone, network, or coaxial protection, the warranty is null and void if a power disturbance damages your equipment through the phone, network, or coaxial lines. You are only covered if the disturbance entered through the AC lines.

This is a Limited Warranty subject to the limitations and exclusions set forth herein.

Belkin Corporation will spend, to repair or replace the damaged connected equipment, at Belkin's option, an amount equal to the fair market value of the damaged equipment or the original purchase price of the equipment, whichever is less, up to the maximum amount set forth below:

Models F9H600-03, F9H600-04, F9H610-04	Up to a maximum of \$10,000.00	
Models F9H700-05	Up to a maximum of \$50,000.00	
Models F9H100-CW, F9H120-CW, F9H320-CW, F9H620-CW	Up to a maximum of \$50,000.00	
Models F9H700-06, F9H702-06, F9H710-06, F5C206 series	Up to a maximum of \$75,000.00	
Models F9H710-12, F9H1000-06, F9H520-06, F9A600-06-MTL, F9H620-06-MTL	Up to a maximum of \$75,000.00	
All models in the F9S series and F9Z series	Up to a maximum of \$150,000.00	
All models in the F9M series	Up to a maximum of \$250,000.00	Data Recovery Warranty*
All models in the F9G series	Up to \$Unlimited	Data Recovery Warranty*

*Subject to all terms and conditions contained herein, in the event of a hard drive malfunction due to the failure of the Belkin Surge Protector to protect your personal computer while it is properly connected to the Surge Protector, Belkin will provide professional data recovery services from ActionFront Data Recovery Labs to salvage remaining or lost data. This warranty in no way guarantees the recovery of such lost data, and services of ActionFront Data Recovery Labs will be provided only on a "best efforts" basis and only to the extent reasonable, as determined by ActionFront Data Recovery Labs in its sole discretion. Data recovery services will only be provided for Surge Protectors that have Data Recovery Warranties and that show sign of an Occurrence.

Belkin Corporation reserves the right to review the damaged Belkin Surge Protector, the damaged equipment, and the site where the damage occurred. All costs of shipping the Belkin Surge Protector and the damaged equipment to Belkin Corporation for inspection shall be borne solely by the purchaser. Belkin reserves the right to negotiate the cost of repairs. If Belkin determines, in its sole discretion, that it is impractical to ship the damaged equipment to Belkin Corporation, Belkin may designate, in its sole discretion, an equipment repair facility to inspect and estimate the cost to repair such equipment. The cost, if any, of shipping the equipment to and from such repair facility and of such estimate shall be borne solely by the purchaser. Damaged equipment must remain available for inspection until the claim is finalized. Whenever claims are settled, Belkin Corporation reserves the right to be subrogated under any existing insurance policies the claimant may have.

All above warranties contained herein are null and void if: the Belkin Surge Protector in use during the occurrence is not provided to Belkin Corporation for inspection upon Belkin's request at the sole expense of the purchaser; Belkin Corporation determines that the Belkin Surge Protector has been opened, improperly installed, altered in any way or tampered with; Belkin Corporation determines that the damage did not result from the Occurrence or that no Occurrence in fact took place; the repair or replacement of the damaged equipment is covered under a manufacturer's warranty, seller's extended warranty or Belkin Corporation determines that the connected equipment was not used under normal operating conditions or in accordance with any labels manufacturer's instructions for the connected devices. All Belkin Surge Protectors must be plugged directly into a properly wired AC power line with a protective ground and must not be "daisy-chained" together in serial fashion with other power strips, UPSes, other surge protectors, three-to-two-prong adapters, or extension cords. Any such installation voids this warranty. The Belkin Connected Equipment Warranty only protects against damage to properly connected equipment where Belkin Corporation has determined, in its sole discretion, that the damage resulted from an Occurrence, and does not protect against acts of God (other than lightning) such as flood, earthquake, war, vandalism, theft, normal-use wear and tear, erosion, depletion, obsolescence, abuse, damage due to low-voltage disturbances (i.e. brownouts or sags), non-authorized program, or system equipment modification or alteration. Do not use this product in anyway with a generator, heater, sump pump, water-related device, life support device, medical device, car, motorcycle, or golf-cart battery charger. To be used indoors only and in dry areas. All warranties contained herein are null and void if used in anyway with any of the aforementioned devices.

This is the sole warranty of Belkin Corporation in respect to connected equipment, lost data or other damages; there are no other warranties, express or implied, except as required by law. Implied warranties required by law include the implied warranty of condition of quality, merchantability and fitness for a particular purpose, and such implied warranties, if any, are limited in duration to the term of this warranty.

Some states do not allow limitations on how long an implied warranty lasts, so the above limitations may not apply.

In no event shall Belkin Corporation be liable for incidental, special, direct, indirect, consequential or multiple damages such as, but not limited to, lost business or profits arising out of the sale or use of any Belkin Surge Protector, even if advised of the possibility of such damages. This warranty gives you specific legal rights, and you may also have other rights, which may vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damage, so the above limitations may not apply to you.

This warranty is valid only for the original purchaser of the product. All damage claims against the product must be made within 15 days from the date of the Occurrence and must be accompanied by a receipt for the damaged equipment or the warranty is void.

Warranty is valid in USA, Canada, Puerto Rico, and Bermuda.

To file a claim against Belkin Corporation, you must take the following steps:

Contact Belkin Corporation at 501 W. Walnut St., Compton, CA 90220, Attn: Claims Department, or call (310) 898-1100, Extension 2425, or use our self-service claim form at <https://web.belkin.com/claims/claims.asp>. All claims must be filed within 15 days of the Occurrence or the warranty is null and void. Be prepared to provide the following information:

- The part number of the Belkin Surge Protector.
- The equipment that was connected to the Belkin Surge Protector at the time of the Occurrence.
- The equipment that was damaged during the Occurrence and the extent of the damage.
- The date of the Occurrence.
- Where you purchased the Belkin Surge Protector.
- When you purchased the Belkin Surge Protector.
- Copy of the original receipt.

Your Belkin Customer Service Representative will then instruct you on how to forward your equipment, receipt, and Belkin Surge Protector in use during the Occurrence, and how to proceed with your claim, including data recovery services.

Please conveniently register your Belkin Surge Protector online on our website belkin.com.

BASIC INSTALLATION INSTRUCTIONS FOR BELKIN SURGE PROTECTORS

Power Connections

- Your Belkin Surge Protector should only be plugged into a grounded outlet. All connected equipment should be plugged directly into your Belkin Surge Protector. Using any extension cord in conjunction with a Belkin Surge Protector will void all Belkin Corporation warranties. For longer cord applications, use our F9G930-10, F9G933-10, and F9G934-10 with a 10-foot power cord, and our F9S820-12, F9H710-12, and F9G1030-12 with a 12-foot power cord.

Phone/Fax/Modem/Network Connections

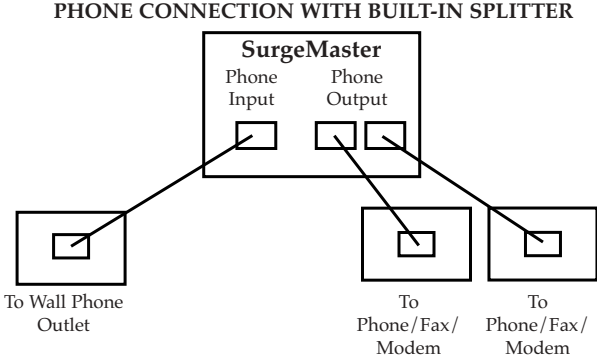

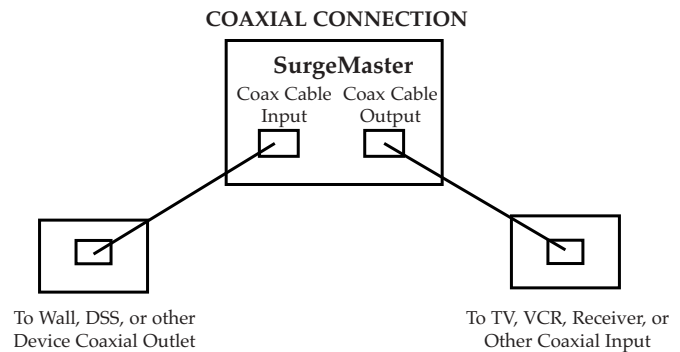

Belkin SurgeMaster TEL models come with phone/fax/modem surge protection. The SurgeMaster F9G934-10 model includes network protection. Instead of running a connection directly from your phone/fax/modem to the wall jack, you must pass the connection through the protected jacks on your Belkin SurgeMaster.

- Connect your phone/fax/modem/network line from your wall outlet to the "Input" jack on the Surge Protector. Connect the six-foot phone cord, or CAT5 cord provided with your Surge Protector, into the "Output" jack on the Surge Protector, and connect the other end of the phone cord to the phone/fax/modem jack of the device you want to protect.
- If you fail to connect the phone/fax/modem protection, and/or network protection, the Connected Equipment Warranty will not cover your connected equipment. Most modem damage can be prevented if you take the time to connect the phone/fax/modem protection.

Coaxial Cable Connections

Belkin SurgeMaster AC models come with coaxial cable surge protection. Instead of running a connection directly from your DSS receiver/TV/VCR/cable box to the wall jack, you must pass the connection through the protected "F" connectors on your Belkin SurgeMaster.

- Connect your incoming cable/antenna/DSS line to the "Input F" connector on the surge protector. Connect the six-foot coaxial cable provided with your Surge Protector into the "Output F" connector on the Surge Protector, and then connect the other end of the coaxial cable to the "Input F" connector of the device you want to protect.
- If you fail to use the coaxial cable protection, the Connected Equipment Warranty will not cover your connected equipment. Most TV/VCR damage can be prevented if you take the time to connect coaxial cable protection.

Indicator Lights

- The "protected" light should be on when the power switch is turned on. If this light goes out at any time, it means that your Surge Protector was sacrificed to protect your equipment and should be replaced. Please contact Belkin Corporation for a free replacement Surge Protector in this case.
- The "grounded" light should be on when the power switch is turned on. If this light does not come on when you plug in your Belkin Surge Protector, you have a ground-wiring problem and you should contact an electrician to properly ground the outlet. Connecting a Belkin Surge Protector to an improperly grounded outlet will void all Belkin Corporation warranties. If your home is properly grounded and the Surge Protector grounded indicator light burns out, please contact Belkin Corporation for your free replacement.
- The light in the switch also powers up when the unit is powered on (models F9H401-03, F9H601-03, F9H600-03, F9H600-04, F9H610-04, F9H700-05). The LED protected and grounded indicator lights power on when the model does not have a lighted power switch. Your Belkin Surge Protector provides maximum surge protection even if the power switch is in the off position.

Un-switched outlet

- Belkin Surge Protectors also offer un-switched outlets on some models. F9H520-06, F9S520-06, and F9M520-08 come with one un-switched outlet and models F9G930-10 and F9G1030-12 come with two un-switched outlets that will not be powered off when the main switch is powered off. This outlet can be used for fax machines, desk lamps, desk clocks, or any other device that may require constant power.
- If the phone cord provided for you is too short for your purposes, then you may use a longer length or standard RJ11 satin-strain cable (phone cable). If you have multiple devices that utilize the same phone line, you may daisy-chain them from the Surge Protector, but only using the phone/fax/modem protection!
- If the coaxial cable provided for you is too short for your purposes, then you may use a longer length of standard coaxial cable. If you have multiple devices that utilize the same cable/antenna line, you may daisy-chain them from the Surge Protector, but only using the coaxial cable protection!
- Even though they may be grounded, some Surge Protector models do not have a "grounded" light on them.
