1. Getting Started

- Your Nostromo n45 Dual Analog USB GamePad will work with any Windows® 98, 2000, Me or XP game. If you are using Windows 2000 or XP, please be sure to plug in your GamePad before installing any software on the enclosed CD.
- The enclosed CD contains the Nostromo Array Programming Software. With this software, you can get the increased programmability and excellent functionality that hardcore gamers crave and need to maintain their edge.
- If you are using a Mac®, there is no need to install any software.

2. Install the Software

- Insert your Nostromo Array Programming Software into your CD/DVD drive on your computer.
- The software will start automatically. If it doesn't, click the "Start" button and choose "Run". Click "Browse" and choose the "CD Drive". Select "setup.exe" and click "OK".
- Follow the on-screen instructions to continue with the software installation.

3. Connect the GamePad

- Connect the Nostromo n45 Dual Analog USB GamePad to an available USB port on your computer.
- Continue to follow the on-screen instructions to complete the installation.

4. Start the Software

- Start the Nostromo Array Programming Software.
- Double-click on  in the taskbar, or find the Nostromo Array Programming Software in the "Start" menu under "Program Files". You also have the option to install this logo on your desktop for direct and easy access.

5. Select Profile

The Nostromo Array Programming Software comes pre-loaded with profiles. To select a profile, open the Nostromo Array Programming Software Profile Editor. Then select the "Open" icon in the taskbar of "Open" in the "File" menu. This will take you to your "Profile Folder" where your profiles are normally stored. Select the profile you would like to use and click "Open".

6. Start the Game

You are now installed and ready to go! Congratulations! Be sure to check your game to make sure you are taking advantage of all the options available.

7. Game Modes

- Red, Green, and Blue Modes—Increase the number of programmable functions using three additional programming modes.
- Mouse—The Mouse Mode allows you use the GamePad to navigate through Windows as if your GamePad was a mouse.

8. Additional Information

For additional information, be sure to check for software and documentation updates and downloads at www.belkin.com.

9. Troubleshooting

The Nostromo n45 is not responding.

- Make sure your cable is connected properly.
- In the Windows “Control Panel/Game Controllers” window, make sure “Nostromo n45 Dual Analog USB GamePad OK” shows up. If you don’t see this line, or if it says “not connected”, unplug the GamePad and uninstall the software and drivers. Then reboot, re-install the software, and plug in the pad. If you are using Windows 2000, be sure to plug in the GamePad first. Also make sure the controller is assigned “ID1” in the “Advanced” tab.
- Make sure your button assignment is what you think it is.
- Try restarting your computer.
- Check for additional information in the Nostromo Array Programming Software Help Files.
- Go to www.belkin.com for further assistance.

The game froze.

- Restart your computer.

The GamePad is not in the Windows “Control Panel”.

- Unplug your GamePad and uninstall the software and drivers. Then reboot, re-install the software, and plug in the GamePad. If you are using Windows 2000, be sure to plug in the GamePad first.

The game settings are wrong.

- If you made a profile for the game, double-check the profile and make sure the settings are correct.
